S.T.E.A.M BASED CURRICULUM

January 2025 was a month of new beginnings and exciting learning at Elhaam Academy! Students embraced the new year with enthusiasm, diving into engaging STEAM projects, interactive lessons, and collaborative activities that fostered creativity and critical thinking. From thought-provoking discussions to hands-on experiments, they explored new concepts while strengthening their skills. January also marked moments of spiritual reflection and community bonding, as we came together to learn, grow, and inspire one another. As we step forward into the year, we remain committed to nurturing bright minds and strong hearts.

THANK YOU

We are immensely grateful to the generous parents who donated a water fountain to our school! Thanks to your thoughtful contribution, our students now enjoy access to clean and refreshing drinking water every day. Your support truly makes a difference in creating a healthier and happier environment for everyone. Thank you for being such a vital part of our school community!

WELCOME BACK TO SCHOOL

HANDS-ON INNOVATION AT ELHAAM ACADEMY!

Our students explored the fascinating world of 3D printing and material science, creating DIY 3D-printed shapes with sand, paint, and glue—blending creativity with technology. They also had a blast experimenting with slime, testing its viscosity to learn about fluid dynamics in a fun, interactive way!

This project is part of our broader focus on the Sustainable Development Goals (SDGs), inspiring innovation and problem-solving for a brighter, more sustainable future.

MATH + FUN = STEAM CLASS SUCCESS!

Our 2nd Graders took math to the next level by solving problems hidden in cups and organizing their answers into stacks of even, odd, and hundreds—all while racing against the clock! This hands-on activity made learning math exciting and interactive. Great job, young problem-solvers!

WORKSHOP ON HATE CRIME PREVENTION

NYPD COMMUNITY AFFAIRS OFFICERS VISIT ELHAAM ACADEMY

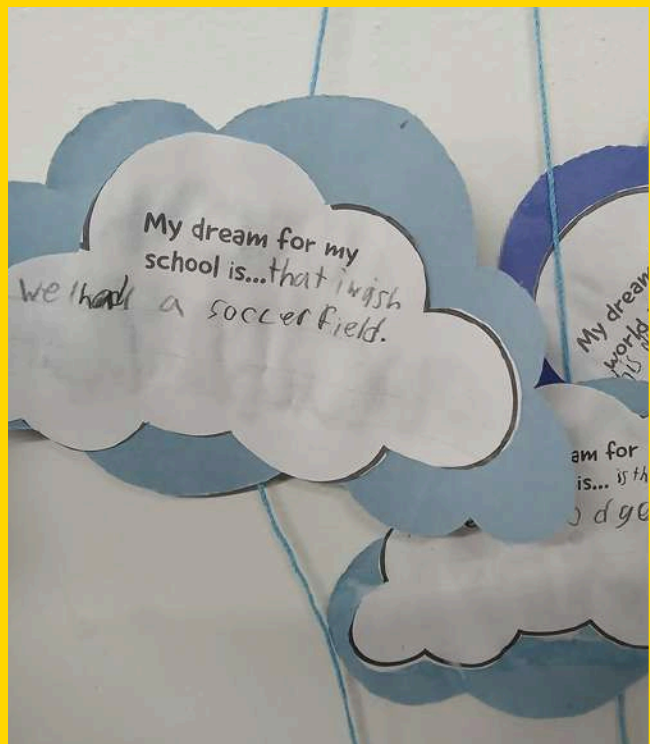

We were honored to welcome the NYPD Community Affairs Officers to Elhaam Academy. Their visit fostered meaningful dialogue and strengthened the bond between our academy and local law enforcement. Together, we're working towards a safer and more connected community.

EXPLORING THE LEGACY OF MARTIN LUTHER KING JR.

Students in the STEAM Club explored the legacy of Martin Luther King Jr. by learning about his life and impact. They reflected on their own dreams and aspirations, creatively expressing them by designing a mobile showcasing their personal goals and hopes for the future.

INTERFAITH HARMONY VISIT

Elhaam Academy students and teachers took a significant step towards promoting peace, harmony, and interfaith understanding through a visit to the Jewish Heritage Museum. The event was organized as part of the academy's ongoing commitment to fostering respectful relationships and encouraging students to learn about diverse cultures and religions.

STUDENTS ENGAGE WITH DR. GEORGE A. GARLAND ON SDG PROJECTS FOR 2025

An inspiring and interactive session took place on January 23, 2025, at 87-41, 165th St, Jamaica, NY, as Dr. George A. Garland, President of the United Nations Association-USA Southern New York Division, met with a vibrant group of students to discuss the United Nations' Sustainable Development Goals (SDGs). Dr. Garland highlighted the importance of the SDGs in building a sustainable and equitable future. He passionately shared how young minds can actively contribute through innovative, youth-led projects. With a focus on SDG Goal Projects for 2025, students explored opportunities to take action on global issues such as climate change, education equality, clean water access, and sustainable cities.

HANDS-ON EXPERIMENTATION

In STEAM Club, students made stress balloons using Orbeez, cornstarch, conditioner, and water! They learned about how cornstarch behaves as a non-Newtonian fluid—a material that changes thickness depending on pressure. When left alone, it's watery, but under pressure, it becomes solid! Afterward, students passed around their stress balloons, comparing firmness and squishiness. A fun, hands-on experiment to explore science while relieving stress!

MCC QUEEN'S FAMILY NIGHT

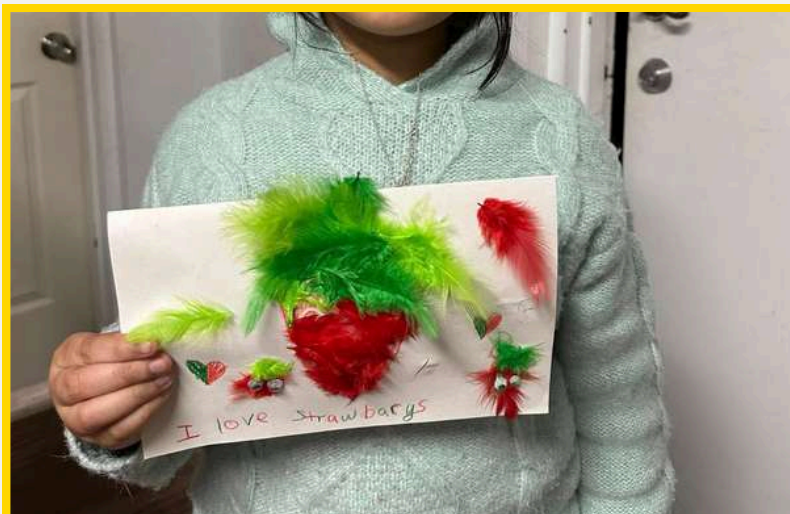

A Night to Remember!
The MCC Kids Family Night at Elhaam Academy was a huge success! The community came together for an evening filled with joy, laughter, and unforgettable moments. Thank you to everyone who joined and made it so special!
Stay tuned—we have BIG news coming soon!

“EA JUNIOR AMBASSADOR” EVENT

Elhaam Academy lit up with joy and energy as young students participated in the highly anticipated EA Junior Ambassador event.

SHEIKH WALEED ELBATRAWISH VISITS ELHAAM ACADEMY
